Rough/Other	

We look forward to working with you throughout your project. Please contact the Building Inspector assigned to your project or our office at (518) 434-5995 or codes@albanyny.gov when it comes time for us to perform the necessary inspections associated with your permit.

For all permits a final inspection will be needed.

Please keep this placard posted in a conspicuous place on premises while work is in progress. All work must be executed in compliance with all applicable laws.

If you anticipate having to change aspects of your project from what you provided us in your permit application, please notify us at (518) 434-5995 or codes@albanyny.gov as any such changes will need to be reviewed and pre-approved.

Renewals may be granted beyond the above expiration date at the discretion of the Building Inspector upon the payment of a renewal fee of one half the original fee for a year's extension or a quarter of the original fee for a six month extension.

If you decide not to perform the permitted work, please contact our office so that we may close the permit.
