#### **SUMMARY**

C.T. Male Associates review of general property information, observation of adjacent properties, research of historical property information, including a review of environmental databases, and a site reconnaissance revealed the following with respect to Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), and Controlled Environmental Conditions (CRECs):

	No Further Action	REC	HREC	CREC	Refer to Section
Property Operations	X				2.3
Neighboring Properties	Х				2.9
User Provided Information	Х				3.0
Regulatory Review - Site	Х				4.0
Regulatory Review - Surrounding Properties	X				4.0
Historical Review	Х				5.0
Liquid Containing Equipment	Х				6.2
Site Drainage	X				6.3
Site Waste Profile	Х				6.4
Underground Storage Tanks	X				6.5
Above Ground Storage Tanks	Х				6.5
Stressed Vegetation, Staining and Odors	Х				6.6

Notes/Recommendations: To understand the subject site and report, the complete report needs to be reviewed. The findings, opinion and conclusions with respect to the subject site are presented in Section 7.0.

#### 1.0 INTRODUCTION

This report presents the findings of a Phase I Environmental Site Assessment (ESA) conducted by C.T. Male Associates Engineering, Surveying, Architecture & Landscape Architecture, D.P.C. (C.T. Male Associates) at the Residential Property at 320 Second Street Site which is located in the City of Albany, Albany County, New York. The site assessment was performed at the request of Ms. Amanda Wyckoff, Property and Development Manager of the Albany County Land Bank Corporation.

This site assessment has been performed in general conformance with the scope and limitations as outlined in ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and in accordance with our contract dated March 30, 2015.

#### 1.1 Purpose

The purpose of this Phase I ESA was to reasonably identify Recognized Environmental Conditions (RECs) on the property. A REC is defined as the presence or likely presence of hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis*<sup>1</sup> conditions are not RECs. A Historical Recognized Environmental Condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria. A Controlled Recognized Environmental Condition (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

A finding of no RECs is not a warranty or guarantee that the site remains free from contamination. The purpose of this report is not intended to include *de minimis* conditions. This report is also not intended to serve as a compliance assessment of the subject property. This environmental site assessment is designed to reduce, but

\_

<sup>&</sup>lt;sup>1</sup> Conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

not eliminate, uncertainty regarding the potential for RECs in connection with the property, within reasonable limits of time and cost.

# 1.2 Scope of Work

This Phase I ESA consisted of the following scope of work:

- A site reconnaissance, including a walkthrough of the site building and site grounds, to identify areas of potential environmental concern;
- Interviews with site representatives knowledgeable of current and former site operations;
- Review of municipal property records and information provided by local government agencies;
- Review of historical information and documents;
- Review of federal and state agency database information for the subject property and neighboring properties to identify potential concerns that could adversely affect the environmental condition of the property; and
- Preparation of a report documenting the findings of the environmental site assessment.

#### 1.3 Significant Assumptions

The following assumptions are made by C.T. Male Associates in this report. C.T. Male Associates relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property owner contact, computer databases and personal interviews. Except as set forth in this report, C.T. Male Associates has made no independent investigation as to the accuracy and completeness of the information derived from secondary sources, and has assumed that such information is accurate and complete. C.T. Male Associates assumes information provided by or obtained from governmental agencies including information obtained from government websites is accurate and complete. Groundwater flow, unless otherwise specified by other data and information, is assumed based on land surface contours depicted on the United States Geological Survey topographic maps. C.T. Male Associates assumes the property has been correctly and accurately identified by the client and property owner contact.

#### 1.4 Limitations and Exceptions of the Assessment

The information presented in this report is limited to the investigation conducted as described in the referenced ASTM guidelines for conducting environmental site assessments, and is not necessarily all inclusive of conditions present at the subject site. Due to inherent limits of time and cost, uncertainty about site conditions remains. The findings, opinion and conclusions stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the site visit. Specific limitations included the following:

- Access Limitations: The basement of the site building was inaccessible due to flooding. Observations of the basement were limited to what could be viewed from the basement staircase.
- Physical Obstructions to Observations: Approximately three inches of snow covered the ground surface obstructing visual observations of the ground. The east side of the building was unable to be viewed due to the recent demolition of the adjoining building.
- Outstanding Information Requests: City of Albany
- Historical Data Source Failure: The site contact had limited information concerning the site. Prior owners were not available to be interviewed.
- Other: The information presented in the report is based on information gathered in accordance with the Scope of Services defined in Section 1 of this report. Information provided by site contacts and local, State and County officials known to be responsible for regulating and enforcing site area environmental conditions was utilized in assessing the environmental conditions at the site. The accuracy of conclusions drawn from this assessment is therefore dependent upon the accuracy of the information provided.

# 1.5 Special Terms and Conditions

This Phase I ESA was prepared in accordance with the stated and agreed upon Scope of Work. No special terms and conditions are applicable to this assessment. This site assessment did not include a review of non-scope issues as identified by ASTM E 1527 including asbestos containing materials, radon, lead in drinking water, lead based paint, wetlands, regulatory compliance, industrial hygiene, health & safety,

ecological resources, endangered species, indoor air quality, mold and cultural & historic resources.

#### 1.6 Reliance

This Phase I ESA has been prepared for the sole use of Albany County Land Bank Corporation. This Phase I ESA cannot be relied upon by other parties without the express written consent of C.T. Male Associates and Albany County Land Bank Corporation.

#### 2.0 SITE DESCRIPTION

#### 2.1 Site Location

The subject site is located at 320 Second Street in the City of Albany, Albany County, New York. The subject site was identified on the City of Albany tax maps as being within the parcel with tax map number section 65.56, block 3, lot 13. The site is located on the south side of Second Street, on the block between Judson Street and Lexington Avenue. A site location map is included in Appendix A as Figure 1. A map showing the site property boundaries is included in Appendix A as Figure 2.

### 2.2 Property/Business Owner

The current property owner is reported to be the Albany County Land Bank Corporation of Albany, New York.

#### 2.3 Current and Former Site Uses

The site is improved with a two family dwelling that dates at least the late 1800s. The building has reportedly been abandoned for the past several years.

#### 2.4 Total Site Area and Topographic Description

The subject site incorporates approximately 2,614 square feet of fairly level land. According to the United States Geological Survey (USGS) Topographic Map, the subject site lies at approximately 230 feet above Mean Sea Level.

#### 2.5 Site Geology

Soils are mapped by the United States Department of Agriculture Web Soil Survey as Urban land-Udipsamments complex, 0 to 8 percent slopes. These well drained soils are composed of coarse sand.

#### 2.6 Site Buildings and Structures

The two story building is a wood frame structure constructed on a full basement and has a flat roof. The two family dwelling is indicated to have been constructed in the 1800s.

#### 2.7 Site Utilities

Although not currently used, electricity and natural gas are supplied to the site by National Grid. Municipal water and sewer service are provided by the City of Albany. The site building was formerly heated by natural gas fired heating units located within the basement of the building. Two natural gas connections were identified within the basement of the building. Remnants of electric baseboard were also identified within the site building.

### 2.8 Roadways or Driveways on or Adjoining the Site

Second Street adjoins the site to the north. A brick and concrete sidewalk lies between the site building and Second Street; however, no driveways or parking areas are located on the site.

# 2.9 Surrounding Land Uses

The surrounding land uses, as identified during the site visit, are described as follows:

North - Second Street lies to the north of the site followed by residential properties.

*West* - Residential properties lie to the west of the site.

*East* - A recently demolished residential building lies to the east of the site.

South - Residential properties which front First Street lie to the south of the site.

#### 3.0 USER PROVIDED INFORMATION

The user (Ms. Amanda Wyckoff representing Albany County Land Bank Corporation) was provided a "user questionnaire" along with the proposed scope of services. The user returned a completed questionnaire which is included in Appendix C.

Note: In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, (the "Brownfields Amendments"), the user must provide the information outlined in this section. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

#### 3.1 Title Records

The deed was provided for the site which indicates the site was conveyed from The County of Albany to the Albany County Land Bank Corporation in 2016. The property is indicated to have been acquired by The County of Albany in a Deed in Foreclosure in 2012. The property is noted to have been included in the List of Delinquent Taxes dated July 19, 2007. The deed is included in Appendix C.

#### 3.2 Environmental Liens or Activity and Use Limitations

According to the response to the user questionnaire, the user is not aware of environmental liens or activity or use limitations for the site.

It is recommended that the user engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations recorded against or related to the property to satisfy Sections 3.1 and 3.2 of this report.

## 3.3 Specialized Knowledge

According to the response to the user questionnaire, the user has no specialized knowledge of the site.

#### 3.4 Commonly Known or Reasonably Ascertainable Information

According to the response to the user questionnaire, the user does not have knowledge of commonly known or reasonably ascertainable information concerning the site.

#### 3.5 Valuation Reduction for Environmental Issues

According to the response to the user questionnaire, the purchase price does not reflect the fair market value of the property; however, the lower purchase price was not related to environmental issues associated with the site.

#### 3.6 Reason for Performing Phase I

This Phase I ESA is being conducted as related to a New York State Attorney General funding requirement.

#### 3.7 Other User Provided Information

The user did not provide any other additional information concerning the environmental conditions relative to the site.

#### 4.0 STANDARD ENVIRONMENTAL RECORD SOURCES

Federal and state environmental databases were reviewed in accordance with ASTM E-1527 Standards to determine if the site or nearby surrounding properties are listed on these databases. The databases were searched for the areas within the ASTM recommended search distance, unless otherwise noted. Reviewed databases are listed below. A copy of the database report is included in Appendix E.

#### 4.1 Federal National Priorities List (NPL) Facilities (Listed and De-Listed)

The subject site was not listed as a NPL hazardous waste facility. No NPL facilities were listed within one mile of the subject site.

# 4.2 Federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) Hazardous Waste Facility List

The subject site was not listed as a CERCLA hazardous waste facility. No CERCLA hazardous waste facilities were listed within ½ mile of the subject site.

# 4.3 Federal Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal (TSD) Facilities List

The subject site was not listed as a RCRA TSD facility. No RCRA TSD facilities were listed within ½ mile of the subject site.

#### 4.4 Federal RCRA Generators List and Corrective Action List

The subject site was not listed on the RCRA generator list. No immediately adjoining properties were listed as RCRA generator facilities.

The subject site was not listed as a RCRA Corrective Action facility. No RCRA Corrective Action facilities were listed within one mile of the subject site.

#### 4.5 Federal Emergency Response Notification System (ERNS) List

The subject site was not listed on the ERNS list.

# 4.6 Federal Institutional Control and Engineering Control Registries

The subject site was not listed on the Federal Institutional Control or Engineering Control registries.

## 4.7 State/Tribal Hazardous Waste Facility List

The subject site was not listed as a State or Tribal hazardous waste facility. Two State hazardous waste facilities were listed within one mile of the subject site as follows:

- Former Loudon and Kem Cleaners, 350 Northern Boulevard, mapped 0.44 miles east-northeast of the site. Groundwater flow at this former dry cleaning facility is reported to be to the southeast therefore, the facility does not appear to be located hydraulically up-gradient relative to the site.
- Former RKO Dry Cleaners, 566 Washington Avenue, mapped 0.65 miles west of the site. Groundwater flow at this former dry cleaning facility is reported to be to the east; however, off-site concentrations of the primary contaminant of concern have been detected at concentrations only slightly above the groundwater standard. Based on the separation distance from this facility and the subject site, impacts to the quality of the soils or groundwater at the site are not anticipated as a result of this facility.

#### 4.8 State/Tribal Solid Waste Facility List

The subject site was not listed on the State or Tribal solid waste facility list. One State listed solid waste facility was listed within ½ mile of the subject site as follows:

 Albany Auto Parts, 222 Spruce Street, mapped 0.43 miles south-southeast of the site. This facility is listed as an inactive vehicle dismantling facility.

# 4.9 State Petroleum Bulk Storage (PBS) Tank and Chemical Bulk Storage (CBS) Facilities

The site was not listed on the State PBS or CBS facilities list. No immediately adjoining properties were listed on the State PBS or CBS facilities list.

# 4.10 State/Tribal Leaking Storage Tanks List

The site was not listed on the State or Tribal leaking storage tank list. Twenty-three (23) leaking storage tank incidents were listed within ½ mile of the site. The leaking tank incidents are not listed for facilities which immediately adjoin the site and each of the 23 incidents have been issued a closed status.

#### 4.11 State/Tribal Institutional Control and Engineering Control Registries

The subject site was not listed on State or Tribal Institutional Control or Engineering Control registries.

#### 4.12 State/Tribal Voluntary Cleanup Program (VCP) List

The site was not listed on the state or tribal VCP list. No VCP facilities were listed within ½ mile of the site.

#### 4.13 State/Tribal Brownfields List

The site was not listed on the State or Tribal Brownfields list. Thirty-two (32) Brownfield facilities were listed within ½ mile of the site and are mapped from approximately 0.26 miles from the site to approximately 0.48 miles from the site. Most of these facilities appear to be listed as they were funded for Phase I and Phase II ESAs through the EPA Brownfield Program Assessment Grants. Two facilities are listed in the New York State Environmental Restoration Program (ERP) as follows:

- Arbor Hill/West Hill Branch Site, Henry Johnson Boulevard, 1st St. and 2nd St., mapped 0.26 miles southeast of the site. The facility was issued a certificate of completion in 2012.
- Arbor Hill Gateway Properties, 225 Henry Johnson Boulevard, mapped 0.33 miles east of the site. Remediation at this facility was listed as complete.

The Former Loudon and Kem Cleaners, previously discussed in section 4.7, is also listed as undergoing a Brownfield Cleanup Program (BCP) application review.

# 4.14 State Spills Lists

No spills were listed for the subject site or for the immediately adjoining parcels.

#### 5.0 RECORDS REVIEW AND INTERVIEWS

#### 5.1 Previous Environmental Site Assessments

No previous environmental site assessments are reported to have been conducted for the subject site.

### 5.2 Aerial Photographs

Aerial photographs were reviewed for the years 2001, 2004, 2007, 2011, 2014 and 2017 from Albany County, NY GIS website. The site appears similar to current conditions for the years reviewed. The aerial photographs are included in Appendix A as Figures 3A-3F. The boundaries depicted on the photographs are for schematic purposes only and do not represent the actual boundaries of the site.

#### 5.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were reviewed for the years 1892, 1908, 1934, 1950, 1989, 1990, 1992, 1993, 1994, 1995 and 1997. A dwelling is depicted on the north side of the site along Second Street and a one story outbuilding is depicted on the eastern side of the site behind the dwelling for the years reviewed. The dwelling was labeled as vacant and boarded up in 1990 and 1992. The Sanborn maps are included in Appendix A as Figures 4A-4K. The boundaries depicted on the maps are for schematic purposes only and do not represent the actual boundaries of the site.

### 5.4 Information From Local Official(s)

Freedom of Information Law (FOIL) requests were submitted to the City of Albany on-line FOIL request system requesting documents from the following departments: Assessment, Building Department, Historian, Engineering, Fire Department and Clerk. At the time of this report a response had not been received from the City of Albany. If pertinent information is received, it will be forwarded upon receipt.

Property assessment records were reviewed on-line from Landmax Data Systems. According to the assessment records the site is classified as a two family residential building. The site is noted to be provided with public water and sewer as well as natural gas and electricity. The following previous ownership information was listed for the site:

Grantor	Date
Beverly A McCasland	1997
Great Financial Bank FSB	1998
Secretary of Housing	2000
Abdulrahem Abdulmusen	2002

# 5.5 Information From Health Department Official(s)

The Albany County Department of Health reported they do not have records concerning soil or groundwater contamination for the subject site.

#### 5.6 Information From Current or Former Property Owner(s)/Site Manager

Ms. Amanda Wyckoff of the Albany County Land Bank Corporation was the site contact for this assessment and acted as a representative of the current property owner. Ms. Wyckoff was interviewed on the site at the time of the site visit and provided a tour of the site buildings and grounds.

### 5.7 Information from the Site Occupants

The site is not currently occupied.

Records of communication are included in Appendix D.

#### 6.0 SITE RECONNAISSANCE

#### 6.1 Conditions of the Reconnaissance

#### 6.1.1 Site Contact(s)

Ms. Amanda Wyckoff of the Albany County Land Bank Corporation was the site contact and was present during the site visit.

#### 6.1.2 Date of Visit

The site reconnaissance was conducted on January 16, 2018 by Ms. Brittany Winslow of C.T. Male Associates. During the site visit the weather was approximately 25°F with overcast skies.

#### 6.1.3 Areas Observed

The site and surrounding areas were observed from Second Street and the approximate site boundaries. The central areas of the site were traversed and site building was entered. Photographs taken during the site visit are included in Appendix B.

# 6.1.4 Limiting Conditions

The basement of the site building was inaccessible due to flooding. Observations of the basement were limited to what could be viewed from the basement staircase. Approximately 3 inches of snow covered the ground surface obstructing visual observations of the ground. The east side of the building was unable to be viewed due to the recent demolition of the adjoining building.

#### 6.2 Polychlorinated Biphenyl-Containing (PCB)/Liquid Containing Equipment

No transformers or capacitors were identified on the site during the site visit.

#### 6.3 Site Drainage

#### 6.3.1 Site Catch Basins and Discharge Location(s)

No catch basins were identified on the site during the site visit.

#### 6.3.2 Site Surface Water Bodies/Areas

No surface water bodies were identified on the site during the site visit.

#### 6.3.3 Building Floor Drains and Discharge Location(s)

No floor drains were identified on the site during the site visit.

#### 6.3.4 Dry Wells and Sumps

No dry wells or sumps were identified on the site during the site visit.

#### 6.4 Site Waste Profile

#### 6.4.1 Solid Wastes/Waste Deposits (Piles/Pits/Landfills/Lagoons)

Building debris and abandoned household type items were identified within the site building and on the southern portion of the property.

#### 6.4.2 Sludges (Generation/Storage/Disposal)

No sludge wastes were identified on the site during the site visit.

#### 6.4.3 Liquids (Generation/Storage/Disposal)

No liquid wastes were identified on the site during the site visit.

#### 6.4.4 Wastewater Discharge(s)

No wastewater discharges were identified on the site during the site visit.

# 6.4.5 Waste Lagoons or Disposal Pits (Current and Historic)

No waste lagoons or disposal pits were identified on the site during the site visit.

# 6.4.6 On-site Septic Systems

No septic systems were identified on the site during the site visit. The site is believed to be connected to the City of Albany municipal sewer system.

# 6.4.7 Drums/Containers

No drums of waste were identified on the site during the site visit.

# 6.5 Underground Storage Tanks (USTs) and/or Above Ground Storage Tanks (ASTs)

No underground or above ground storage tanks were identified on the site during the site visit.

#### 6.6 Observed Evidence of Potential or Known Site Contamination

# 6.6.1 Evidence of Soil Contamination/Liquid Discharges

Evidence of soil contamination or liquid discharges was not identified on the site during the site visit. Stressed vegetation was not identified on the site during the site visit.

#### 6.6.2 Soil or Surface Disturbances

No soil or surface disturbances were identified on the site during the site visit.

### 7.0 FINDINGS, OPINION AND CONCLUSIONS

### 7.1 Findings

The site is improved with a two family dwelling that dates at least the late 1800s. The building has reportedly been abandoned for the past several years.

The site was not listed within the environmental databases report. Multiple facilities were listed within the database report within the specified search radii. Although there may be degradation to the quality of soils and/or groundwater in the site area, direct impacts to the quality of soils or groundwater at the site were not identified from these listed facilities based on information provided within the database report.

Solid wastes consisting of building materials and abandoned household items were identified within the site building and on the southern portion of the property.

# 7.2 Opinion

It is our opinion that the information and data collected during this Phase I ESA does not indicate the presence or likely presence of hazardous substances or petroleum product within the site under conditions which indicate an existing release, past release or material threat of a release.

It is our opinion that the solid wastes that are located within the site should be removed from the site for proper disposal; however, it is our opinion that the presence of the materials does not represent an REC.

#### 7.3 Conclusions

C.T. Male Associates has completed a Phase I ESA for the Residential Property at 320 Second Street Site in general conformance with the scope and limitations of ASTM Practice E 1527. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

# 7.4 Opinion Regarding Further Inquiry

Based on the findings of this ESA, no further action with respect to soil or groundwater is recommended.

#### 8.0 DEVIATIONS AND ADDITIONAL SERVICES

Deletions or deviations from the ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, are described in Section 1.0 of this report.

No additional services beyond the scope of ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process were completed in conjunction with this Phase I ESA.

#### 9.0 SIGNATURES

We declare that, to the best of our professional knowledge and belief we meet the definition of Environmental Professional as defined in 312.21 of 40 CFR Part 312. And we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes are included in Appendix F.

Respectfully submitted, C.T. MALE ASSOCIATES

## **APPENDIX C**

**User Questionnaire** 

#### **USER QUESTIONNAIRE**

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, (the "Brownfields Amendments"), the user must provide the following information. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Section 1 (1) Environmental alconum lians that are filed as recorded against the site (40 GER 212.25)	Yes	No
(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)  Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?*  (2) Activity and land use limitations that are in place on the site or that have been filed or		$\square$
recorded in a registry (40 CFR 312.26)  Are you aware of any activity use limitations such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? *  (3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40)		$\overline{\mathbf{X}}$
CFR 312.28)  As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		K)
(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the		LA
lower purchase price is because contamination is known or believed to be present at the property?   Check here if not applicable (i.e. This ESA is not being prepared pursuant to the sale of the property.)		□x
5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)		
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of release or threatened releases? For example, as user,  (a) Do you know the past uses of the property?  (b) Do you know the specific chemicals that are present or once were present at the property?  (c) Do you know of spills or other chemical releases that have taken place on the property?  (d) Do you know of any environmental cleanups that have taken place at the property?		
(6) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)		
As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?		$\overline{\mathbf{X}}$
	The second secon	

If any shaded boxes are checked, please provide additional information on page 2.

<sup>\*</sup> It is recommended that the user engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations recorded against or related to the property to satisfy items 1 and 2 of this questionnaire and to establish a chain of ownership of the property.

Section 2: Additional Information:						
1. Reason why Phase I ESA is required:						
Attorney General funding requirement						
2. Other User Provided Information						
Provide previous environmental site assessments, environmental monitoring reports, tank closure reports etc. and describe in detail if you checked any shaded boxes on page one (i.e. answered "Yes" for questions 1, 2, 3, 5 or 6 or if you answered "No" to question 4).						
Properties were transfered for \$1 not because of any known environmental issuse

ALSO ALL THAT CERTAIN LOT, PIECE, OR PARCEL OF LAND situate, lying and being in the City of Albany, County of Albany and State of New York described as "PARCEL No. ALBANY 6044-09-0000467 612 Third Street, City of Albany (Tax Map No. 65.30-2-9)" in the Deed in Foreclosure conveying said premises to the party of the first part executed by the Enforcing Officer of the County of Albany, New York, Tax District on 10/16/2013 and recorded in the Office of the Albany County Clerk on 10/16/2013 in Book 3080 of Deeds at Page 1008 made pursuant to the Final Judgment of Foreclosure with respect to said premises granted to said Tax District by the Albany County Court on 10/8/2013 and entered in the Albany County Clerk's Office on 10/9/2013 in the proceeding commenced in that Court under Index No. 6044-09 entitled "In the Matter of the "In Rem" Delinquent Tax Lien Foreclosure Proceeding brought pursuant to Article Eleven, Title 3 of the Real Property Tax Law by THE COUNTY OF ALBANY, NEW YORK, TAX DISTRICT against Those Parcels of Real Property described in the LIST OF DELINQUENT TAXES filed on 8/10/2009 covering the City of Albany, Albany County".

This conveyance is made pursuant to and is conditioned by Resolution No. 173 of the Albany County Legislature for the year 2016 adopted on 4/11/2016 approving the sale and conveyance of said premises to the party of the second part.

Title to the premises hereby conveyed is subject to: (a) any state of facts an accurate survey or personal inspection of the premises would disclose; (b) all applicable zoning, land use and building code regulations; (c) any easements, covenants, conditions and rights-of-way of record existing at the time of the levy of the unpaid tax subject of the delinquent tax foreclosure action/proceeding in which party of the first part acquired title to the premises; (d) liability for village taxes, if applicable; (e) liability for a pro-rata share of current property and school taxes on the premises; (f) liability for any unpaid or payable street, sewer, or other special assessments on the premises; and (g) liability for any unpaid or payable water or sewer charges against the premises.

**Together with** appurtenances and all the estate and rights of the party of the first part in and to said premises.

To Have and to Hold the premises herein granted unto the party of the second part and said party's heirs, successors and/or assigns forever.

**In Witness Whereof** the party of the first part has caused these presents to be signed by its duly authorized officer on the date above written.

IN THE PRESENCE OF

#### PARTY OF THE FIRST PART

The COUNTY OF ALBANY, NEW YORK

BY: Deniel P. M Can L

FORMER LOUDON AND KEM CLEANERS NAME: Rev: 08/15/2017

ID/Status: 529273 ADDRESS: 350 NORTHERN BOULEVARD

ALBANY, NY 12204

**ALBANY** 

**SOURCE:** NY Department of Environmental Conservation

**BROWNFIELDS:** Program: BCP Site Code: 529273

Acres: 3.9

HW Code: C401060 SWIS: 0101 Town: Albany (c)

Record Added Date: 06/21/2016 Record Updated Date: 07/28/2017

Update By: JEBROWN

Site Description: LOCATION The former Loudon and Kem Cleaners site is located in an

urban area in the northern section of the City of Albany, NY. The site is northwest of Northern Boulevard, northeast of Albany-Shaker Road, east of Old Hickory Road, and southwest of Loudonville Road (Route 9). SITE FEATURES The site area is approximately 3.9 acres and

is developed with an L-shaped retail building (strip mall). The building contains many separate businesses that operate in the single-story portion of the building and a three story office

building located in the center of the building. The remainder of the

site is parking for the businesses and office. CURRRENT ZONING/USE(S)

The site is currently zoned commercial and most of the tenant spaces

in the strip mall are currently occupied. The surrounding parcels include an apartment complex to the north, west, and southeast, a

hospital to the south, and a major highway and golf course to the

east and northeast. The nearest residence is located approximately

0.25 miles to the west of the site. PAST USE OF THE SITE Two separate

addresses/tenant spaces were occupied by dry cleaners (known as

Loudon Dry Cleaners, Kem Cleaners and possibly other names) that used

tetrachloroethene (Perc, PCE) from approximately 1954 to 1997. The

current dry cleaner business, Kem Cleaners converted to 'drop-off

service only' in 1997. SITE GEOLOGY AND HYDROGEOLOGY The overburden

geology consists of varied medium to fine sands, silts, and clays. The depth to groundwater varies across the site from 13 to 20 feet below ground surface. The ground water flow direction is to the

southeast.

Env Problem: Based on investigations conducted to date, the primary contaminants

of concern (COC) for the site include the following chlorinated

solvents: tetrachloroethene (PCE), trichloroethene (TCE), 1,2-dichloroethene (cis-DCE), and vinyl chloride (VC). In addition to volatile organic compounds (VOCs) soil and groundwater was also

analyzed for semi-VOCS, metals, pesticides, and poly-chlorinated

biphenyls (PCBs). Soil vapor was analyzed for VOCs. Soil: Only a few

site-related COCs were detected above the protection of groundwater

soil cleanup objectives (PGWSCOs)/unrestricted use SCOs (UUSCOs) as

**SOURCE:** NY Department of Environmental Conservation

follows: PCE at 11.9 milligrams per kilogram (mg/kg) or parts per million (ppm) vs. PGWSCO of 1.3 ppm, Cis-DCE at 0.44 ppm vs. PGWSCO of 0.25, and VC at 0.056 ppm vs. PGWSCO of 0.02 ppm. No metals, SVOCs, PCB/pesticides, or other VOCs were found above the commercial SCOs for soil. Site-related soil contamination is not expected to extend off-site based on the available data. Groundwater: On-site groundwater standards were exceeded for VOCs including: PCE up to 650 micrograms per liter (ug/L) or parts per billion (ppb), TCE up to 36 ug/L, and cis-1,2-DCE up to 190 ug/L. No metals, SVOCs, PCB/pesticides, or other VOCs were found above groundwater standards. Soil Vapor and Indoor Air: Sub-slab soil vapor and indoor air data were collected from six (6) locations on-site. Based on the data, soil vapor was only a concern under the southeast portion of the on-site building, which contained both former dry cleaners. PCE was detected as high as 130,000 micrograms per cubic meter (ug/m3), with a corresponding indoor air concentration of 9.8 ug/m3, on-site. On-site trichloroethylene (TCE) was also detected in the soil vapor as high as 14,000 ug/m3, with a corresponding indoor air concentration being non detectable. The highest indoor air concentration for TCE was 0.68 ug/m3, on-site. Off-site soil vapor

intrusion evaluations were performed on the hospital property and the adjacent apartment complex, and it was determined that no off-site structures require mitigation.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised

as additional information becomes available.

Site Description: This site is made up of five properties which were originally part of

the Henry Johnson Boulevard Properties ERP site (E401049). The five properties were located on Henry Johnson Blvd. between 1st and 2nd Streets. The five properties were investigated with the remaining Henry Johnson Boulevard properties and were subsequently sold to the Albany Public Library (APL) for construction of the Arbor Hill/West Hill library branch. APL signed a consent order with the Department and put a vapor barrier and passive sub-slab venting system beneath the slab of the new building. They sampled the sub-slab vapor after the building was constructed and there were no issues requiring further remediation. APL was issued a Certificate of Completion on

April 24, 2012.

Region: 4 Town: Albany (c) Acres: 0.55

Record Added: 11/05/2004 Record Updated: 04/28/2017 Updated By: MJKOMORO

Site Description: Location: The site is located in the Arbor Hill section of the City

of Albany, Albany County. The property primarily fronts on Northern Boulevard (also known as Henry Johnson Boulevard) and its intersections with Livingston Avenue and Colonie Street. The site area encompasses approximately 0.5 acres. Site Features: The main site feature includes the redeveloped Arbor Hill Gateway Park and the Henry Johnson Memorial in the park. The park area is a mixture of paved and landscaped areas. Current Zoning/Use: The property is zoned commercial and has been redeveloped into a community park. The surrounding properties are a mixture of residential, commercial, and road rights-of-way. Historical Uses: The property was historically used as a gas and service station. Records indicated that there were six registered tanks at the facility. This included five underground storage tanks (USTs - four gasoline and one diesel fuel) and one above-ground storage tank for #2 fuel oil. A maintenance pit, sump, hydraulic reservoir, and the gas dispenser islands were present on the site. Poor housekeeping and leaking storage vessels appear to have led to the soil and groundwater contamination. A Phase I Environmental Site Assessment (ESA) was conducted in November 2003. A Phase II ESA, which included a surface and subsurface investigation, was conducted in July 2004. Subsequent to this investigation the city of Albany removed debris and remaining structures from the site, including an above-ground storage tank, due to the collapse of the service station building. The maintenance pit was also backfilled with soil at that time. The Phase I and II ESAs indicated subsurface petroleum contamination of both the soil and groundwater in the area of the former service station and USTs. Based on the Phase I and II ESAs, the city of Albany was able to enter the Environmental Restoration Program to address the contamination at the property. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site

**ALBANY** 

**SOURCE:** NY Department of Environmental Conservation

that for technical reasons can be addressed separately to investigate, eliminate, or mitigate a release, threat of release, or exposure pathway resulting from site contamination. Operable Unit 1 (OU1) is the on-site source area of the former gas and service station. OU2 consists of the off-site groundwater and soil vapor. Site Geology and Hydrogeology: The underlying soil deposits at the site are fine to medium brown sands and silt over silt and clay, and backfill materials consisting of gravel, stone dust, and bank sand. The water table is between 4' and 14' below the ground surface. Groundwater generally follows the topography, flowing east across the site.

Env Problem: Remediation at the site is complete. Contaminants of Concern at the site prior to remediation were primarily petroleum hydrocarbons (gasoline range volatile organics - BTEX) and small quantities of semi-volatile organics (polynuclear aromatic hydrocarbons - PAHs) associated with the petroleum products. Most of the impacted soil was removed from the site during the Remedial Investigation - Tank and Vessel Closure Action. A small area of residual contamination was necessarily left in place at the site during this action because of its proximity to and around underground utilities and to Northern Boulevard and Colonie Street. The remedial investigations at OU1 and OU2 indicated that there are no current or potential future environmental exposure pathways that require remediation. Groundwater contamination above SCGs (1,2,4-trimethylbenzene, benzene, ethylbenzene, and xylenes) is present in one on-site monitoring well. Concentrations of contaminants in groundwater have shown significant reductions due to natural attenuation. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the groundwater is being managed under a Site Management Plan. The five-year monitoring period in the Record of Decision went through 2014. Monitoring has shown contaminant concentrations in groundwater have not dropped to below applicable groundwater standards for two consecutive years, so monitoring will continue.

Health Problem: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was KOCH 12-30-04: T.M. Koch contacted Eric Deyoe at the Pine Bush Fire Station. He explained to me that a pressure test was done on the underground tank, and the results indicated a potential tank leak but the test was not conclusive. There was no actual evidence of any leakage however, so a second test is planned for next week, depending upon weather conditions. 2-2-04: Eric Deyoe called T.M. Koch to let me know that a pressure test was finally completed. The test showed that there was no leak. He will send me a copy of the test results soon. 2-4-04: Copies of the original tank tightness test of December 29, 2004 and the re-testing of January 21, 2004 arrived today. The

ALBANY, NY 12204

**ALBANY** 

SOURCE: NY Department of Environmental Conservation

SHWS: Program: HW Site Code: 441363

Classification: Significant threat to the public health or environment - action

required. Region: 4 Acres: 3.9 HW Code: 401060

HW Code: 401060 Record Add: 10/26/2010 Record Upd: 07/05/2017 Updated By: JEBROWN

Site Description: LOCATION: Former Loudon and Kem Cleaners site is located in an urban

area in the northern section of the City of Albany, NY. The site is northwest of Northern Boulevard, northeast of Albany-Shaker Road, east of Old Hickory Road, and southwest of Loudonville Road (Route 9). SITE FEATURES: The site area is approximately 3.9 acres and is developed with an L-shaped retail building (strip mall). The building contains many separate businesses that operate in the single-story portion of the building and a three story office building located in the center of the building. The remainder of the site is parking for the businesses and office. CURRRENT ZONING/USE(S): The site is currently zoned commercial and most of the tenant spaces in the strip mall are currently occupied. The surrounding parcels include an apartment complex to the north, west, and southeast, a hospital to the south, and a major highway and golf course to the east and northeast. The nearest residence is located approximately 0.25 miles to the west of the site. PAST USE OF THE SITE: Two separate addresses/tenant spaces were occupied by dry cleaners (known as Loudon Dry Cleaners, Kem Cleaners and possibly other names) that used tetrachloroethene (Perc, PCE) from approximately 1954 to 1997. The current dry cleaner business, Kem Cleaners converted to drop-off service only in 1997. SITE GEOLOGY AND HYDROGEOLOGY: The overburden geology consists of varied medium to fine sands, silts, and clays. The depth to groundwater varies across the investigation area from 13 to 32 feet below ground surface (13-20 feet bgs on-site and up to 32 feet bgs off-site). The ground water flow direction is to the southeast. ADDITIONAL SITE INFORMATION: The on-site " strip mall" portion of the site was allowed entry into the Brownfield Cleanup Program on 8/31/16, and NYSDEC is implementing an off-site groundwater remedy within the hospital property. (April 2017)

Env Problem: NATURE AND EXTENT OF CONTAMINATION: Based on investigations conducted

to date, the primary contaminants of concern (COC) for the site include the following chlorinated solvents: tetrachloroethene (PCE), trichloroethene (TCE), 1,2-dichloroethene (cis-DCE), and vinyl

**SOURCE:** NY Department of Environmental Conservation

chloride (VC). Soil: Only a few site-related COCs were detected above the protection of groundwater soil cleanup objectives (PGWSCOs)/unrestricted use SCOs (UUSCOs) as follows: PCE at 11.9 milligrams per kilogram (mg/kg) or parts per million (ppm) vs. PGWSCO of 1.3 ppm, cis-DCE at 0.44 ppm vs. PGWSCO of 0.25, and VC at 0.056 ppm vs. PGWSCO of 0.02 ppm. No metals, SVOCs, PCB/pesticides, or other VOCs were found above the commercial SCOs for soil. Site-related soil contamination is not expected to extend off-site based on the available data. Groundwater: On-site groundwater standards were exceeded for VOCs including: PCE up to 650 micrograms per liter (ug/L) or parts per billion (ppb), TCE up to 36 ug/L, and cis-1,2-DCE up to 190 ug/L. At off-site locations, PCE was detected up to 5,100 ug/L and TCE up to 140 ug/L. The applicable groundwater standard for all of these compounds is 5 ug/L. No metals, SVOCs, PCBs/pesticides, or other VOCs were found above groundwater standards. Soil Vapor and Indoor Air: Sub-slab soil vapor and indoor air data were collected from six (6) locations on-site and two (2) locations off-site. Based on the data, soil vapor was only a concern under the southeast portion of the on-site building, which contained both former dry cleaners. PCE was detected as high as 130,000 micrograms per cubic meter (ug/m3), with a corresponding indoor air concentration of 9.8 ug/m3, on-site. On-site trichloroethene (TCE) was also detected in the soil vapor as high as 14,000 ug/m3, with a corresponding indoor air concentration being non detectable. The highest indoor air concentration for TCE was 0.68 ug/m3, on-site. Off-site soil vapor intrusion evaluations were performed on the hospital property and the adjacent apartment complex, and it was determined that no off-site structures require mitigation. At the hospital, the highest sub-slab PCE concentration was 1,800 ug/m3 with 2 ug/m3 in indoor air. Soil vapor samples were also collected outside of the hospital annex with PCE concentrations of 820 ug/m3 and 100 ug/m3. However, because the hospital slab is 3 feet thick and indoor air concentrations were so low, it was determined that no mitigation was required. At the adjacent apartments the sub-slab concentration was 1.5 ug/m3 and the indoor air concentration was 22 ug/m3, suggesting an indoor source rather than impacts from soil vapor intrusion.

Health Problem: Direct contact with contaminants in soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by the contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This

process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Soil vapor intrusion sampling identified impacts to southern half of the strip mall building and actions are needed to address soil vapor intrusion. Measures are in place at one off-site building to address the potential for soil vapor intrusion. Actions are not needed to address the potential for soil vapor intrusion at other existing off-site structures. A soil vapor intrusion evaluation will be necessary should new buildings be built at the site or off-site in the portion of the property that is currently serving as a parking lot of the adjacent hospital.

Site Description: Location: The RKO Dry Cleaners site is located in the City of Albany

at the intersection of Ontario St. and Washington Ave. It is bordered by Ontario St. to the west, Washington Ave. to the north, and residential structures to the east and south. Site Features: The site, which is approximately 50 feet wide by 70 feet long, is currently a vacant lot covered with concrete and gravel. Until June 2012, a circa 1950 building was present on the property with an area of approximately 2,575 square feet. The building was a one-story structure with a flat roof and a basement beneath approximately half the building. A fire occurred at the building in 2000 that left charred wood on much of the interior of the structure and holes in the roof. The exterior of the building was subsequently boarded up. In June 2012, the building was razed due to safety concerns by Albany County. A small driveway exists on the east side of the site. Current Zoning and Land Use: The site is currently vacant and is zoned for residential use. The surrounding area consists of a mix of residential and commercial properties. Past Use of the Site: The property was developed as early as 1909. From 1964 to 2005, the site was occupied by RKO Dry Cleaners and Tailors, except for the year 1995 when Lee's Market was listed as the occupant. In December 2000, a large fire occurred at the site and a spill was called in (0010595) due to the presence of containers of dry cleaning chemicals which may have been spilled. Site Geology and Hydrogeology: The geology of the overburden aquifer consists of generally brown, plastic clay that transitions into a mixture of silt and clay at approximately 7.5 feet to 10 feet below ground surface. Some fine sand layers were also encountered. Although bedrock was never encountered, the Phase I Environmental Site Assessment (ESA) indicated the bedrock is Normanskill Shale. Groundwater was encountered at approximately 9.5 feet below ground surface and flows toward the east, eventually discharging into the Hudson River.

Env Problem: Soil and groundwater have been analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals,

poly-chlorinated biphenyls (PCBs), and pesticides. Soil vapor has been analyzed for VOCs. Based upon investigations conducted to date, the primary contaminant of concern is tetrachloroethene (PCE) and its breakdown products. PCE was found in the soils, groundwater, and soil vapor on and off the site. Soil - PCE is found in soils on-site up to 110 parts per million (ppm). The unrestricted use soil cleanup objective (UUSCO) level for PCE is 1.3 ppm. PCE levels above UUSCOs were localized near a former door of the former building at depths ranging from 6 to 12 feet below ground surface (bgs). One other location near the middle of the former building exhibited PCE concentrations of 3.5 ppm at a depth of approximately 12 feet bgs. Groundwater - PCE is found in groundwater on-site at concentrations ranging from non-detect (ND) to 9,600 parts per billion (ppb). The groundwater standard for PCE is 5.0 ppb. Off-site concentrations of PCE have been found at different locations ranging from ND to 21 ppb. Soil Vapor and Indoor Air - Sub-slab soil vapor data was collected from one location on-site and three locations off-site. PCE was detected on-site at 50,000 micrograms per cubic meter (ug/m3) near the edge of the basement of the former building. Three off-site structures were sampled, and the sub-slab air PCE concentrations were above 1,000 ug/m3 at two of the three locations. However, the indoor air concentrations were comparable to the background levels commonly found in homes where vapor intrusion is not occurring. Currently the building slabs are effectively preventing soil vapor intrusion. The New York State Department of Health recommends mitigation if a structure has 1,000 ug/m3 of PCE or greater in this case, due to the potential for future exposures to sub-slab concentrations. Therefore, a sub-slab depressurization system (SSDS) was installed on one building, and one other is being monitored periodically since a SSDS could not be effectively installed. Special Resources Impacted/Threatened: None Significant Threat: The site presents a significant environmental threat due to the ongoing potential releases of contaminants from source area/s into groundwater.

Health Problem: People will not come into contact with contaminated soils since they are located at depth and beneath a building foundation. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds (VOCs) in groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion (SVI). The potential for off-site inhalation exposures due to SVI is currently being investigated. To date, the indoor air and soil vapor

was sampled in three off-site structures. The concentrations of VOCs detected in the indoor air of these structures are within the range of contaminant levels commonly found in homes where SVI is not occurring and their presence at the concentrations detected do not represent a health concern. However, based on the results of the soil vapor samples collected from beneath these buildings two of the three structures warrant mitigation due to the potential for SVI to occur in the future should the building conditions change.

#### **Database Descriptions**

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-CESQG - RCRA - Conditionally Exempt Small Quantity Generators.

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROL - Sites with Institutional Controls.

#### **Database Descriptions**

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal CERCLIS: SHWS Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites SHWS - Inactive Hazardous Waste Disposal Sites in New York State

State/Tribal SWL: SWF/LF Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF - Facility Register

State/Tribal LTANKS: INDIAN LUST R4 INDIAN LUST R8 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R7 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R1 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R6 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R6 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land. LUSTs on Indian land in Alaska, Idaho, Oregon and Washington. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land LTANKS - Spills Information Database. HIST LTANKS - Listing of Leaking Storage Tanks.

State/Tribal Tanks: UST Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons. UST - Petroleum Bulk Storage (PBS) Database CBS UST - Chemical Bulk Storage Database. MOSF UST - Major Oil Storage Facilities Database. CBS - Chemical Bulk Storage Site Listing. MOSF - Major Oil Storage Facility Site Listing. AST - Petroleum Bulk Storage. CBS AST - Chemical Bulk Storage Database. MOSF AST - Major Oil Storage Facilities Database. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. TANKS - Storage Tank Facility Listing. TANKS NASSAU - Registered Tank Database in Nassau County.

State/Tribal IC / EC: ENV RES DECL RES DECL - Restrictive Declarations Listing. The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution. RES DECL - Environmental Restrictive Declarations ENG CONTROLS - Registry of Engineering Controls. INST CONTROL - Registry of Institutional Controls.

State/Tribal VCP: VCP VCP NYC - Voluntary Cleanup Program Listing NYC. New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. VCP NYC - Voluntary Cleanup Agreements

ST/Tribal Brownfields: BROWNFIELDS A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant. BROWNFIELDS - Brownfields Site List ERP - Environmental Restoration Program Listing.

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

#### **Database Descriptions**

Other Haz Sites: US CDL A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. US CDL - Clandestine Drug Labs

Other Tanks: CORTLAND CO. UST A listing of underground storage tank sites located in Cortland County. CORTLAND CO. UST - Cortland County Storage Tank Listing WESTCHESTER CO. UST - Listing of Storage Tanks. NASSAU CO. UST - Registered Tank Database. ROCKLAND CO. UST - Petroleum Bulk Storage Database. SUFFOLK CO. UST - Storage Tank Database. Qualifications

## C. T. Male Associates

## Aimee Smith

Managing Environmental Scientist, Real Estate Transactions

#### **Education:**

Bachelor of Arts, Math, College of St. Rose, Albany, NY

Associates in Science, Adirondack Community College, Glens Falls, NY

#### **Professional Affiliations:**

Board Member, Town of Northumberland Zoning Board of Appeals, 2014-Present

## **Specialized Training:**

OSHA 40-Hour Health & Safety Training and Annual 8 Hour Refresher

OSHA Supervisors Hazard Communication Training Course

OSHA 10-Hour Construction Safety Training

#### **Continuing Education:**

Saratoga County Planning and Zoning Conference

Quality Management in Design

Technical and Professional Course on Phase I Environmental Site Assessment for Commercial Real Estate

Integrated Fixed Film and Activated Sludge Process

Grantsmanship Training Program

Professional Liability Workshop

Management of Hazardous Wastes

Ms. Smith joined the firm in 1993 and specializes in managing Phase I and Phase II Environmental Site Assessments and other environmental services related to real estate transactions such as National Environmental Policy Act (NEPA) reviews, HUD Statutory Checklists and Transaction Screen Assessments. Ms. Smith also manages underground storage tank closures and other remedial activities that may be required before ownership of a property can be transferred or used as collateral.

Ms. Smith also manages and assists with projects in NYSDEC's Brownfield Cleanup Program, Brownfield Opportunity Area projects and industrial waste investigations. Ms. Smith has current certification in OSHA Hazardous Waste Operations Health and Safety Training (29 CFR 1910.120).

#### Notable Project Experience:

#### Phase I Environmental Site Assessments

- Luther Forest Technology Campus, Malta & Stillwater, NY
- TD Bank, Adirondack Trust Company and Trustco Bank - Various Locations in NYS
- Albany County Land Bank Corporation, Various locations in the City and County of Albany

#### **Phase II Environmental Site Assessments**

- Former Gasoline Station, Cobleskill, NY
- Automotive Repair Facility, Saratoga Springs, NY
- Former Fuel Oil Bulk Storage Facility, Saratoga Springs, NY
- Former Automobile Dealership, Troy, NY
- Freight House and Former Truck Repair facilities in Fort Edward, NY

#### NYSDEC ERP & BCP and Other Remedial Projects

- PCB Remediation Project and Underground Storage Tank Closure in, Queensbury, NY
- PCB Remediation Project at Fiberglass Industries, in Amsterdam, NY
- Former Hoe Bowl Underground Storage Tank Closure, Hyde Park, NY
- Empire Generating, Rensselaer, NY

## Department of State Brownfield Opportunity Area Projects

- Town & Village of Malone, NY Step 1
- Town of Fort Edward, NY Step 2
- City of Amsterdam Step 1

#### SEQR/NEPA

- Land Reutilization Corporation of the Capital Region (Schenectady Land Bank)
- Albany County Land Bank Corporation

## C. T. Male Associates

**Brittany Winslow** *Environmental Scientist* 

#### **Education:**

Bachelor of Science, Environmental Geosciences, Boston College, Chestnut Hill, MA

## **Continuing Education:**

Understanding Phase I Environmental Site Assessments, Lorman Online Learning

ASTM E1527 Phase I Environmental Site Assessment for Commercial Real Estate

#### **Specialized Training:**

Method 9 Certification, Eastern Technical Associates

OSHA 40-Hour Health & Safety Training

OSHA 10-Hour Construction Safety Training

Ms. Winslow joined the firm in 2015 and is performing Phase I Environmental Site Assessments for commercial, industrial and financial institutions and participation in various other environmental projects. Her work includes field reviews, database searches, FOIL correspondence and report preparation.

## Notable Project Experience:

#### **Environmental Site Assessments (ESAs)**

- Phase I ESA 251, 345-351 Congress Street, Troy, NY
- Phase I ESA Barton Mines, Johnsburg, NY
- Phase I ESA 34-22 35<sup>th</sup> Street, Astoria, NY
- Phase I ESA Sacandaga Campground, Day, NY
- Phase I ESAs of Five Sites in Troy, NY
- Phase I ESA Courtyard by Marriott, Saratoga Springs, NY
- Phase I ESA, Former Wright-Malta Building 25 Complex, Malta, NY
- Various Phase I ESAs, Albany Land Bank, Albany, NY
- Phase I ESA Fairfield Square Vacant Land, Clifton Park, NY
- Phase I ESA Update, Former Mooradian's Building, Troy, NY
- Phase I ESA, Belltop Apartments, Rensselaer, NY
- Phase I ESA, 92 Acre Tract of Vacant Land, Wilton, NY
- Phase I ESA, Hamilton Hill (Hillside Project), Schenectady, NY
- Phase I ESA, Forrest Point Apartments, East Greenbush, NY

### Transaction Screen Assessments (TSAs)

- Transaction Screen Assessment, 112 Broad Street, Waterford, NY
- Transaction Screen ESA, City Lofts of Cohoes, Cohoes, NY

#### Other

- Method 9 Opacity Testing, Townsend Leather, Gloversville, NY
- Method 9 Opacity Testing, Saint-Gobain Performance Plastics, Hoosick Falls, NY
