

AREA VARIANCE APPLICATION

Part 1. Application Notes

An application for an Area Variance is a request for relief from the dimensional or development standards of the USDO for a specific property. An application may be submitted after denial of a proposed project or development by the Chief Planning Official or the Chief Building Official.

- 1. The Board of Zoning Appeals (BZA) reviews the application at a public workshop and public hearing and makes its decision based on the standards in Section 375-5(E)(21)(c)(i).
- 2. An Area Variance application asks the BZA to change the standard code requirements because of a unique situation. The burden of proof lies with the Applicant and requested variances will only be granted if an application and supporting materials meet the necessary criteria.
- 3. The BZA is required to grant only the minimum variance that it deems necessary and adequate to address the hardship while preserving and protecting the character of the neighborhood and health, safety and welfare of the community.
- 4. The decision of the BZA is final and another application for the same or essentially the same approval cannot be submitted within one year from the date of the decision.

Note: A pre-application meeting is available upon request prior to submitting this application.

	2			
Part 2. General Information				
Project Address: 8 Bogardus Road	Tax ID Number(s): 64.65-1-67			
Zoning District: R-1M	Current Principal Use: Garage			
Part 3. Project Description				
(Describe the variance and identify the standard(s) or requirement(s) of the USDO proposed to be varied):				
Select the type of standard(s) or requirement(s) being varied:				
☐ Lot area ☐ Lot width ☐ Impervious lot coverage	☐ Height ☐ Minimum setback ☐ Fence/wall standard			
☐ Off-street parking/loading/circulation standard ☐ Landscap	ing/buffer standard Exterior lighting standard			
☐ Signage ☐ Other (Specify; must reference a specific standard in the USDO):				
Section number of USDO from which the variance(s) is being requested: (2) @ $375-4(A)(a)(i)$; $375-4(A)(3)(a)(iii)(A)$				
Current USDO requirement(s) or standard(s): 10 Ft. & 25 Ft Same setback as adjoining lots				
Proposed requirement(s) or standard(s): Add one story to existing structure at lot line against existing structure on adjoining lot				

Part 4. Character of the Neighborhood

Explain why the dimensional alteration being proposed will not result in a structure or a configuration that will be out of place in the neighborhood or zone district (e.g., the structure's overall size and footprint size and placement are similar to the structures on adjacent properties):

Existing structure present for many years adjacent to adjoining structure and fence on adjoining property at the property line. The proposed construction would merely add one story to a pre-existing structure and an addition within lot line specs. This is not a new structure to trigger 375-4(A)(3)(a)(iii)(A)

Part 5. Alternatives Considered

Describe the benefit to be achieved by the granting of the variance and why such benefit cannot otherwise be reasonably achieved (detail any alternatives that were considered and rejected, and include evidence where necessary to support your conclusions):

The first floor of the pre-existing structure is a garage and will remain a garage. Due to the size of the lot, the location of the current structure and the location of structures on adjoining lots, it is impossible to erect a dwelling upon the premises within the set back and side lot restrictions and still have vehicular access to the garage.

Area Variance Application Form Updated: April 2019

	Part 6. Substantiality			
Indi	cate why the requested variances is not a substantial or contextually significant deviation from the prevailing regulatio	n:		
	Part 7. Impact on Environment			
	cribe any potential impact on such factors as drainage, traffic circulation, dust, noise, odor, public services, among other	ers (e.g., com	pliance with	
the	USDO requirement to be varied would result in the removal of three mature trees and a natural berm):			
	Part 8. Self-Created Difficulty			
Expl	lain why the need for the variance requested is not self-created (e.g., the lot was created in 1954 and does not comply	with the mini	mum lot area	
requ	uirements of the USDO):			
Dout A Culturittal Danningment Charlet
