Dear Chairman Berkley,

I am Joseph Toomey and live at 65 Lenox Ave and live within the 250 feet of 82 Euclid Ave. I walk by this property at least once a day and find the height of the wall to be very high for this residential neighborhood. It is amazing that this has been going on for well over a year, with construction started and stopped on several occasions and a large pile of dirt on the front lawn for months. The large pile of dirt would wash out onto the sidewalk, which made walking the sidewalk unsafe at times.

In walking the neighborhood I do not see any other retaining walls even close to the height that this wall is currently at. It's my understanding that the current height is not the allowable height for a retaining wall in this neighborhood. The wall should be lowered to only the height allowed and able to fulfill its purpose of holding back the ground for the basement entrance into the law office at 82 Euclid Ave.

Thank You for your time.

Joseph Toomey
